

UG Program in Artificial Intelligence and Data Science

Academic Year	2025-26				
Department	Artificial Intelligence and Data Science				
Course code	ADLR1706	Course Name	Major Project - 1		
Student Details					
Sr. No.	Full Name	Class	Roll No.	Contact No.	Email-Id
1	Shubh Shah	BE-13	49	9022654301	shubh.17191@sakec.ac.in
2	Shreyash Mokani	BE-13	30	7977043026	shreyash.17269@sakec.ac.in
3	Nigranth Shah	BE-13	58	9152352574	nigranth.17430@sakec.ac.in
4	Anurag Kumar	BE-13	25	9334005742	anurag.kumar17647@sakec.ac.in
Project Details					
Title of the Project	Engunity X : AI-Powered SaaS Platform for Research, CodeGeneration and Data Analysis				
Project Group No.	01				
Domain (AI, IP, Data Mining, Security, etc.)				AI	
Project Classification (Application, Product, Research, Review, etc.)				SaaS Product	
Guide Details					
Internal Guide Name		Dr. Rahul Pachade			
Co-Guide Name(If any)					
For Outhouse Projects					
External Guide name			Email-Id		
Name of the Organization			Designation		

FINAL YEAR PROJECT LOG BOOK

Major Project –II Course Objectives

The primary objective is to meet the milestones formed in the overall project plan decided in Project - I. The idea presented in Project -I should be implemented in Project -II with results, conclusion and future work. The project will culminate in the production of a thesis by each individual student.

UG Program in Artificial Intelligence and Data Science

Major Project – II Course Outcomes and Mapping to Program Outcomes and Program Specific Outcomes

CO No.	Course Outcomes By the end of the course, students should be able to	Weightage (%)	Program Outcome No.	Program Specific Outcome No.
1	Apply appropriate engineering tools, components, or resources to refine the prototype into a functional solution	15%	PO1, PO3, PO5, PO10	PSO1, PSO2
2	Develop the complete system for the selected problem using advanced technical skills while complying with engineering standards.	20%	PO1, PO2, PO3, PO5, PO10	PSO1, PSO2, PSO3
3	Evaluate the system's performance through systematic testing, benchmarking, simulation, or experimentation to draw valid conclusions.	20%	PO1, PO2, PO3, PO4, PO5	PSO1, PSO2, PSO3
4	Evaluate the final solution in terms of innovation, originality, scalability, and sustainability to identify potential improvements	15%	PO1, PO2, PO3, PO6	PSO1, PSO2, PSO3
5	Justify effective teamwork and leadership while upholding ethical principles and professional conduct during project execution.	15%	PO6, PO7, PO8, PO10	PSO3
6	Compose project outcomes through professional reports, technical papers, or oral presentations with responsibility and professionalism.	15%	PO1, PO3, PO5, PO10	PSO1, PSO2

Attachment(s)

(a) (Referred doc)

#	Paper	Focus
1	Vaswani et al. (NeurIPS 2017)	Transformer architecture
2	Lewis et al. (NeurIPS 2020)	RAG framework
3	Reimers & Gurevych (EMNLP 2019)	Sentence embeddings (SBERT)
4	Gao et al. (ACL 2023)	Zero-shot dense retrieval
5	Cormack et al. (SIGIR 2009)	Fusion for retrieval (RRF)

UG Program in Artificial Intelligence and Data Science

(b) (Simulation result)

Welcome back, Shahshubh655
Your workspace is ready

ACTIVE CHATS: 12 sessions
DOCUMENTS: 47 files
NOTEBOOKS: 8 active
CODE PROJECTS: 15 repos

ACTIVE WORK

- API Integration Research (2 min ago) - Running
- generator.py (15 min ago) - Draft
- ML Model Training Notes (1 hour ago) - Complete
- Performance Analysis (3 hours ago) - Complete

INTELLIGENCE SIGNALS

- 3 pending code reviews require attention
- Model training completed with 98.5% accuracy
- API rate limit approaching threshold (85%)

RECENT ACTIVITY

- 14:32 Saved generator.py
- 14:28 Created New Chat Session
- 14:15 Exported Analytics Report
- 13:45 Uploaded research_data.csv

Engenuity AI • Dashboard v1.0.0

Research Workspace
Deep-web synthesis and academic intelligence gathering.

1 Exploration 2 Analysis 3 Synthesis 4 Finalization

12 Active Nodes 4.2GB Indexed Log Decision New Project

Deep Research Agent
Multi-step iterative research with source evaluation & conflict resolution

What would you like to research? (e.g., "Compare React vs Vue for large-scale applications")

Standard (3-5 sources) Start Research

Identified Sources

- Neural Attention Mechanisms (Vaswani et al. • 2017 • Paper) 98%
- Latent Space Distribution v2 (Engenuity Core • 2025 • Internal) Direct
- Vector Quantization Strategies 74%

Research Clusters

- Latent Diffusion 92%
- Transformer Efficiency 74%
- Vector Indexing 48%

Mesh is analyzing 1,402 related tokens from latest Active submissions.

UG Program in Artificial Intelligence and Data Science

The screenshot displays the ENGUNITY Data Analysis interface. The left sidebar contains navigation options: Overview, Neural Chat, Code Lab, Notebook, Research, Documents, Analytics, Job Prep, Decision Vault, and Github Repos. The main panel is titled 'Data Analysis' and shows a dataset named 'Linear Regression - Sheet1.csv' with 300 rows and 2 columns. The 'Quick Cleaning' section includes toggle switches for Remove Nulls, Normalize Values, Encode Categorical, Drop Duplicates, and Detect Outliers. The 'Dataset Summary' section shows 1,000 total rows, 10 columns, no missing values, and high data quality. The 'AI Assistant' at the bottom provides a forecast: 'Based on historical patterns, we expect a 12% increase in target metrics over the next quarter.'
