

UG Program in Artificial Intelligence and Data Science

Academic Year	2025-26				
Department	Artificial Intelligence and Data Science				
Course code	ADLR1805	Course Name	Major Project - 2		
Student Details					
Sr. No.	Full Name	Class	Roll No.	Contact No.	Email-Id
1	Shubh Shah	BE-13	49	9022654301	shubh.17191@sakec.ac.in
2	Shreyash Mokani	BE-13	30	7977043026	shreyash.17269@sakec.ac.in
3	Nigranth Shah	BE-13	58	9152352574	nigranth.17430@sakec.ac.in
4	Anurag Kumar	BE-13	25	9334005742	anurag.kumar17647@sakec.ac.in
Project Details					
Title of the Project	Engunity X : AI-Powered SaaS Platform for Research, CodeGeneration and Data Analysis				
Project Group No.	01				
Domain (AI, IP, Data Mining, Security, etc.)	AI				
Project Classification (Application, Product, Research, Review, etc.)	SaaS Product				
Guide Details					
Internal Guide Name	Dr. Rahul Pachade				
Co-Guide Name(If any)					
For Outhouse Projects					
External Guide name		Email-Id			
Name of the Organization		Designation			

FINAL YEAR PROJECT LOG BOOK

Major Project –II Course Objectives

The primary objective is to meet the milestones formed in the overall project plan decided in Project - I. The idea presented in Project -I should be implemented in Project -II with results, conclusion and future work. The project will culminate in the production of a thesis by each individual student.

UG Program in Artificial Intelligence and Data Science

Major Project – II Course Outcomes and Mapping to Program Outcomes and Program Specific Outcomes

CO No.	Course Outcomes By the end of the course, students should be able to	Weightage (%)	Program Outcome No.	Program Specific Outcome No.
1	Apply appropriate engineering tools, components, or resources to refine the prototype into a functional solution	15%	PO1, PO3, PO5, PO10	PSO1, PSO2
2	Develop the complete system for the selected problem using advanced technical skills while complying with engineering standards.	20%	PO1, PO2, PO3, PO5, PO10	PSO1, PSO2, PSO3
3	Evaluate the system's performance through systematic testing, benchmarking, simulation, or experimentation to draw valid conclusions.	20%	PO1, PO2, PO3, PO4, PO5	PSO1, PSO2, PSO3
4	Evaluate the final solution in terms of innovation, originality, scalability, and sustainability to identify potential improvements	15%	PO1, PO2, PO3, PO6	PSO1, PSO2, PSO3
5	Justify effective teamwork and leadership while upholding ethical principles and professional conduct during project execution.	15%	PO6, PO7, PO8, PO10	PSO3
6	Compose project outcomes through professional reports, technical papers, or oral presentations with responsibility and professionalism.	15%	PO1, PO3, PO5, PO10	PSO1, PSO2

What is there in manual steps ?

VECTOR RAG SINGLE_HOP CONTEXT REFINED CONFIDENCE: 89%

Multi-Query Expansion (4 paths)

AI QUALITY CRITIQUE:

Analysis 1: "IsSup: Yes" - The response is supported by the context. The context explicitly mentions that the "Engunity Manual Recovery Steps" section outlines the final steps that must be done manually by the user. 2: "IsRel: No" - The response is not directly relevant to the query. The query asks for the manual steps, but the response only mentions that the steps are outlined in the "Engunity Manual Recovery Steps" section without providing the actual steps. 3: "IsUse: No" - The response is not useful because it does not provide the necessary information to the user. Critique: The response is accurate in stating that the manual steps are outlined in the "Engunity Manual Recovery Steps" section, but it fails to provide the actual steps, which is what the user is looking for. This response is more of a redirect to the original document or source, which may not be feasible or convenient for the user. Final Confidence Score: 0.6 The response is partially accurate in referencing the correct section, but it lacks the necessary information to be considered useful.

According to the provided context, the manual steps are outlined in the "Engunity Manual Recovery Steps" section. However, the actual steps are not explicitly listed in the provided context.

The relevant excerpts mention that the AI agent cannot perform these actions securely because they involve private passwords, external dashboards, or (admin) permissions.

However, it does mention that there are recovery steps that must be done manually by the user, but it does not provide the actual steps.

If you need to know the manual steps, I would recommend checking the original document or source that contains the "Engunity Manual Recovery Steps" section.
